

Create an adorable advent calendar for your home.

Embroidery suggestions and tips:

- The first design in the design pack contains the entire Christmas Calendar: CD101111TA. This design is 13.90” H x 11.57” wide or 353 mm x 294 mm.
- If you do not have hoop large enough to embroider the design you can use the individual designs found in the design pack to create the calendar.
- There are many ways to accomplish this. You can open the full design in your embroidery software and print it. Using this print out as a template on your fabric to line up the individual files.
- If you are not able to open the full design you can open the individual design and print each one, piece them together and use them as a template on our fabric.

Other ideas:

- Purchase the Mini Christmas Design Pack and the Mini Christmas 2 Design Pack. Embroider each of these designs onto fabric and cut away backing. Then cut each one out and add a piece of Velcro on the back of each.
- When each day passes add a new Mini Christmas design over the day on the calendar.
